

Benjamin Molloy

Cincinnati, OH | (513) 374-8989 | btmolloy2@gmail.com | linkedin.com/in/ben-molloy/

Objective

Senior undergraduate specializing in network security and software development, seeking to apply skills in DevOps process automation, scripting, and configuration management while continuing to grow as a software and network professional.

Education

BACHELOR OF SCIENCE | NORTHERN KENTUCKY UNIVERSITY | AUGUST 2020 – MAY 2026

- Major: Applied Software Engineering, Cyber Security & Computer Information Technology
- Minor: Computer Science
- GPA: 3.95

Skills & Abilities

- Python, Bash & PowerShell Scripting
- Network & Server Administration
- VM Provisioning and Management
- DevOps Process Automation
- Technical Troubleshooting
- Incident Handling and Response
- Team Leadership and Mentoring

Work Experiences

FULL STACK WEB DEVELOPER | NKU

JANUARY 2024 – SEPTEMBER 2025

- Designed and maintained a secure, full-stack web platform, from the user interface to the back-end systems, in support of interactive cyber security challenges.

SERVER & NETWORKING TEAM SUPPORT SPECIALIST | NKU

AUGUST 2023 - CURRENT

- Managed server configuration and network maintenance, including AD and MS server solutions.
- Configured, updated, and maintained Cisco devices and Dell servers across campus, ensuring robust network infrastructure.

STUDENT TECHNOLOGY SUPPORT SPECIALIST | NKU

FEBRUARY 2022 – AUGUST 2023

- Diagnosed and resolved a range of hardware, software, and networking issues while delivering technical support and training to end-users.

DEVOPS INTERN | DEANHOUSTON

MAY 2023 – AUGUST 2023

- Developed and maintained web servers, employing AWS, Vue.js, and Node.js for optimal operation and load balancing.
- Automated server updates and implemented monitoring systems to enhance operational efficiency and system reliability.

Projects

NETTOWER (NETWORK TOPOLOGY TOOL) | NKU CAPSTONE

JANUARY 2026 – MAY 2026

- Designed and built an agentless network discovery platform that maps local topology using combined passive packet analysis and active scanning techniques.
- Engineered a modular, event-driven Python backend to process network data, correlate devices, and persist dynamic host relationships in MongoDB.

Extra-Curricular Experiences

HEAD OF R&D, NKCYBER CLUB | NKU

AUGUST 2021 – CURRENT

- Lead cyber security-focused projects, including developing malware protections and innovative physical security solutions, utilizing languages such as Python, PowerShell, Bash and JavaScript.
